EDUCATION

University of Manchester

MSc Innovation Management and Entrepreneurship, 1st Class (Grade: 75)

- Bicentenary Global Futures Scholarship awardee
- Best Startup Pitch – **TaskNinja** at Annual High-Tech Entrepreneurship Competition
- Dissertation: *The Increasing Degree of Modularity in Semiconductor Industry*

Sep 2024 – Ongoing

Manchester, UK

Universiti Putra Malaysia, Malaysia

Bachelor of Software Engineering, 2:1 Class with Honours

- Vice Chancellor's List & Dean's List recipient
- Finalist of 5 Minutes Final Year Project (5MFYP) Competition by IEEE Young Professionals

Sep 2017 – Sep 2021

Selangor, Malaysia

PROFESSIONAL EXPERIENCES

Generatif

Technical Co-Founder

- Led Agile-based digitalisation projects for SMEs, advising on technology strategy and implementing MACH architecture to modernise workflows, migrate legacy systems, and enable scalable product growth.
- Delivered tailored web, mobile, and SaaS platforms using Next.js, React Native, Flutter, and headless CMS, reducing development costs by up to 40% compared to traditional agencies while maintaining high UI/UX quality.
- Improved clients' online platform discoverability through SEO optimisation, schema markup, and analytics integration; ensured full search engine indexing and consistently achieved Lighthouse scores above 90 in SEO and accessibility.

Jan 2022 – Sep 2024

Jakarta, Indonesia

TDCX Malaysia

Front-End Developer (Google Tag Team)

- Deployed, maintained, and monitored the implementation of Google dev APIs and tracking tools (GTM, GA4, Merchant Centre) across 100+ SEA-based client apps using custom stacks (React, Laravel, PHP) & CMS platforms (WordPress, Shopify, Wix, Drupal), enabling data-driven ad optimisation and full-funnel performance insights.
- Diagnosed and resolved advanced technical issues in tag implementation, site rendering, and conversion tracking through in-depth code audits, schema configuration, and real-time debugging across browsers and platforms.
- Acted as a technical liaison between clients and Google Account Managers, translating business needs into scalable implementation plans and supporting campaign KPIs through actionable data integration.
- Initiated and published internal tooling enhancements for Google's ERP & Salesforce SAP case management system by developing automation scripts adopted across markets, reducing QA errors by 15% and streamlining support workflows.

Sep 2021 – Aug 2024

Kuala Lumpur, Malaysia

Huacomm Telecommunications

Software Developer Intern

- Designed and built an internal HR management system using microservices architecture for scalability, automating payroll, IoT-based attendance, and tax processing, streamlining company operations under a 6-month internship period.
- Delivered multiple concurrent clients' full-stack projects using Flutter, PHP, JavaScript, and Python; containerised services with Docker, deployed on CentOS, and implemented CI/CD pipelines to support scalable delivery under Agile sprints.
- Promoted to project lead for internal application development after early project delivery and quality recognition; coordinated development milestones and interfaced with senior stakeholders.
- Mentored and supervised three new interns and collaborated with sales & marketing teams to translate business requirements into functional app components, walkthroughs, and documentation for non-technical users.

Mar 2021 Oct 2021

Kuala Lumpur, Malaysia

CERTIFICATION

Oracle Cloud Infrastructure 2025 Certified Associate (Oracle), **AWS Machine Learning Foundation** (AWS), **Scrum Certified** (SCRUMstudy), **Agile Project Management Fundamentals** (Project Management Institute)

PROJECT LIST

(Full Technical Project list: naufalfathur.vercel.app)

Consulting Project for MolyMem Ltd and Vector Homes (Master's Project)

- MolyMem is a graphene-based membrane filtration startup; Vector Homes is modular & sustainable housing startup.
- Delivered a consulting report with stakeholder plans and a strategic roadmap, assessing external environment and internal capabilities to strengthen market positioning and support commercialisation.

TaskNinja, AI-Gamified Task Manager (Best Pitch Award)

- Led ideation, product strategy, and closely monitored user testing of task breakdown and gamified productivity to solve student time management issues.
- Achieved 80% productivity and time management improvements, with a 60% boost in task completion and motivation.
